

Water Resource Development Commission

Overview

DELIVERABLE: Report characterizing future water demands and supplies at the county and groundwater basin level in 25-year, 50-year and 100-year increments, with recommendations for further studies or necessary legislation required for implementation.

OBJECTIVES

1. Compile and consider projected water needs of each county and groundwater basin over the study period;
2. Identify and quantify water supplies currently available in each county and groundwater basin;
3. Compare current and future water supplies and demand to identify unmet demand
4. Identify potential water supplies that could be used to meet additional demands over the study period;
5. Identify any legal or technical issues associated with the use of those supplies;
6. Identify potential mechanisms to finance the acquisition of water supplies and infrastructure necessary to treat or deliver the water supplies.
7. Develop recommendations regarding the need for further studies and evaluations
8. Prepare a report of findings and recommendations, including recommendations for suggested legislation
